Seed Oats—Seed Rye—Vetch—Austrian Winter Peas—Italian Rye Grass—Seed Potatoes—Beans—Peas— Onion Sets—Grass Seeds—Plants—Fertilizers.

We carry a complete line of all Farm, Field and Garden Seed and conduct a series of experiments and tests on our Roseland Farm which enables us to supply the Farmer of the South with the best and most productive Crops. Our seeds are all of the Hy-Test Germination, and we take every precaution in filling your orders, which means we give you personal attention.

READ THIS—These seeds are all grown especially for us, and are fresh, genuine and reliable. We handle no commission seeds. Seeds of the best quality often fail to germinate by reason of improper planting, weather conditions, etc.; in fact, most failures are from disregard of necessary conditions, and since these conditions are so varied and so far beyond our control it is impractical for us to in any way guarantee crop results, and while we exercise every care in reason, we give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds, and will not be in any way responsible for the crop. MARKET GARDENERS or other large planters, requiring larger quantities of seeds than are here offered, are invited to write us for Special Prices, and must be sure to state Varieties and Quantities they will want.

JUST WHAT MARTIN'S HY-TEST QUALITY MEANS: THIS—That every pound of seed we send out are thoroughly tested for germination by an expert in the best equipped laboratory in the U. S. and if not found satisfactory they are never put in stock. While this precaution takes time and money, we consider that is the only manner we can afford to do business, as it is our intention to use every care and precaution to give the Florida Planters the very highest quality seeds; and when we do this, we know that we MERIT THEIR CONFIDENCE AND WARRANT THEIR BUSINESS.

A new and distinct Dwarf Green Variety are well pleased. A new and distinct Dwarf Green Variety. Attains a height of three to three and a half feet, produces long slender green pods (10 to 12 inches), comparatively free from ridges, and the most prolific the originator has ever seen; easily produces 20 per cent. more caskets of uniform size pods than any other.

We know that we make no mistake recommending Martin's Favorite Okra, either for home or market.

ONION SETS

Ten to twelve bushels to the acre, according to size. Prices subject to market change. Add 10c per quart if wanted by mail. CULTURE—Plant the sets 4 inches apart, in rows about ½ inch deep and 1 foot between the rows, do not cover the sets entirely. Onions is a SUC-CESSFUL FALL CROP in the South, and should be more generally practiced. We advise ordering early. We handle large quantities of Onion Sets each fall. Our crop this season is excellent quality. Send in your orders at once. Lbs. and 5 lbs., postpaid; 10 lbs and 40 lbs., not postpaid.

MARTIN'S HY-TEST ONION SEED

One ounce will plant 100 feet of drill, 5 or 6 pounds in drills for an acre. For sets from 50 to 60 pounds should be sown to the acre, according to the richness of the soil. Matures about 180 days from sowing.

richness of the soil. Matures about 180 days from sowing. CULTURE—The Onion, unlike most vegetables, succeeds well when culti-vated on the same ground for successive years. Sow thinly in drills about $\frac{1}{4}$ inch deep and 1 foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually so that they stand 3 or 4 inches apart. Keep the surface of the ground open and free from weeds by frequently hoeing, taking care not to stir the soil too deeply or to collect it about the growing bulbs.

YELLOW BERMUDA—This is the standard variety for market crops for shipping. While it is known as "White Bermuda," it is really a light straw-color or pale yellow. We make this explanation, as many who grow it for the first time expect to find a pure white Onion. Less than six months required from the time of sowing the seed to the full maturity of the crop. Our genuine Teneriffe-grown seeds are grown especially for us and im-ported direct, and we know there is no better stock to be had. May be sown either in the fall or early spring. We import direct, and sell great quantities.

MARTIN'S NEW CROP HY-TEST TURNIP SEED

Turnips can be planted in Florida almost the year round. From 3 to 4 bunds to an acre. Matures for table use in from 55 to 85 days, according pounds to to variety.

CULTURE-Plant for succession from August to April in drills 14 inches apart and thin out plants to 6 inches. Turnips thrive best in a highly enriched, sandy, gravelly or light, loamy soil. Spring sowings should be put in early so that they will attain a good size before hot weather; other-wise they will become tough and bitter.

FIELD SEED

PASTURE CROPS CUT THE FEED BILLS We do not know of a State that is so well adapted to grow pasture or green food as Florida and at the present time while everyone is trying to reduce expenses and overhead, we strongly urge our customers to sow liberally of grain and grasses that they might have sufficient pasturage for their stock, as well as an abundant cutting of hay. Write us for information on grain and forgen grass and forage crops.

SPECIAL FIELD SEED PRICES

SPECIAL FIELD SEED PRICES The price on Field Seeds, such as Seed Oats, Rye, Rape, Vetch. etc., is not settled and there is constantly some change in prices. On this account it will be to the advantage of any of our customers who are contemplating placing an order for Field Seeds to submit a list of their requirements and we will be pleased to reply immediately quoting lowest market prices and giving full information. We suggest you make up a complete list of Field Seeds you intend to use, submit it to us for prices and we will figure as close as possible on the highest quality selected seed and will give these inquiries special attention to avoid delay.

"Martin's Hy-Test Seeds Are the Best for Florida" NEW CROP SEEDS READY

SEED OATS

Selected. Southern Grown. Recleaned. Sow at rate of from 2 to $2\frac{1}{2}$ bu. per acre. Write for special quantity prices.

In Florida and the Southern States, there is an increasing demand for quick grazing crops. Oals takes an important place in supplying this demand. Of the varieties best suited for this section, our demonstration and information has proven the FULGHUM to be one of the most satisfactory varieties that can be planted. It is very sturdy in habit and not apt to blow down; has long, drought-resisting taproot; matures evenly and is one of the earliest varieties. We cannot recommend it too highly to our customers and strongly urge a very liberal seeding of this crop. Our seed has been carefully selected and especially grown for us.

Fulghum Oats Texas Red Rust Proof The Famous 100 Bushel Burt or 90 Day	Peck 35c 35c 35c 35c 35c	Bu. 75c 75c 75c 75c	F Qua	10 Bu. rite or ntity rice
VETCH				

1 lb. 10 lbs 25c 15c 25 lbs. 100 lbs.

Write for prices large quantities.

Oats and Vetch make a most excellent combination for pasture or hay crop, as the Oats hold the Vetch up which makes it easier to cut, while the Vetch furnishes Nitrogen to the soil and feeds the Oats. This combination has been thoroughly tested on our Roseland Farms and our experience shows us that it gives most excellent results. Sow at the rate of 1 bushel Oats and 30 pounds of Vetch.

SEED GRAIN Selected-Recleaned

Write for special quantity prices

Abruzzi Rye, Genuine Southern Grown Ordinary Winter Rye, Northern Grown Winter Barley	Peck 50c 45c 65c	Bu. 1.50 1.40 2.00	5 Bu.
Japanese Buckwheat	75c	2.25	

ABRUZZI RYE—Southern Grown For planting in this state, we recommend the "SOUTHERN GROWN ABRUZZI RYE."

ABRUZZI RYE." Abruzzie Rye is far superior to the ordinary rye varieties. In carefully conducted tests, we find that it will give from two to three times the amount of pasturage or forage that ordinary varieties will. In addition to its heavy yields, it possesses the distinct advantage of grow-ing upright, making it easy for the animals to graze. It does not lie flat on the ground. It grows off upright from the very start. Northern Rye—This rye has not proven satisfactory in Florida and South Georgia. We recommend it to our customers further north of this section. It will not grow so tall or head up for cutting like the Abruzzie Rye. Ex-cellent quality grain but not adapted for Southern planting.

DWARF ESSEX RAPE

DWARF ESSEX RAPE A splendid annual pasture plant relished by all live stock and of rapid growth. Under favorable conditions it is ready to pasture in about eight weeks after seeding. Especially good for hogs, an acre of good rape easily supplying pasture for 20 hogs for two months. It may be sown with small grain and when the grain is harvested the Rape will prove excellent pasture for all stock, including poultry. Sow broadcast at the rate of 6 to 10 pounds to the acre from July to November, and again in the spring, if necessary. One of the most cheaply produced and highly profitable forage crops for fall and winter.

E. A. MARTIN SEED CO. have representatives and connections in all im-portant sections of the United States and Europe and accordingly we are able to supply our customers with the very highest grade GRASS SEEDS possible to obtain.

to obtain. When you send E. A. MARTIN SEED CO. an order for grass or field seeds you can know it will be filled from stock which should give satisfactory results in your section. If you are looking for seed values instead of bai-gains we can satisfy you. We are giving special attention to GRASS SEEDS for LAWNS, GOLF COURSES, and PASTURE CROPS, and can supply to advantage both as to quality and price ANY QUANTITY up to car lots, any grass or field seeds adapted to FLORIDA AND THE SOUTH. Don't hesitate to call on us for any information we might supply. We are pleased for you to call on us and glad to serve you.

GOLF COURSES

For several seasons we have supplied some of Florida's best courses with our Hy-Test Putting Green Mixture with highly satisfactory results. We have testimonials on file as to their superiority over other mixtures, and if you are not using it, you should write to us at once for information and prices. We know it is superior and will give desired results. Our demand has doubled this season.

CARPET GRASS

Sow 75 pounds per acre for Lawns, or 1 pound for a space 20x20. Carpet Grass is to the light and sandy soils what Bermuda is to the heavier and richer soils. It reaches its greatest perfection on the light soils near the Gulf Coast. Its creeping habit of growth, the fact that it thrives under trees and shade as well as the open, also that it stays green winter and summer in most sections of Florida, is bringing it into great popularity as a Lawn Grass and for Golf Courses.

It is excellent for pasture, seldom growing large enough to be worth cutting for hay. It will stand close grazing and heavy trampling better than any other grass in the Gulf region; in fact, a considerable amount of trampling seems necessary to its best growth, as it disappears when stock is taken from the field or land and put into cultivation.

MARTIN'S FALL AND WINTER LAWN MIXTURE

Sow 100 pounds per acre, or 1 pound for a space of 20x20. This is a superb special mixture for winter lawns and is adapted only to Florida. If you will use this mixture and give your lawn good care you will have one of the finest lawns possible to obtain. Now is the time to start. Per lb. 35c; 5-lb. lots 30c; 25-lb. lots 25c; 100-lb. lots 20c.

We have Special LawnGrass Mixtures for Golf Courses, Country Clubs, Public Parks and Play Grounds. Write us for prices. Our Special Lawn Fertilizer should be used to obtain best results. \$2.00 per 100-lb. bag; 5 bag lots, \$1.75 per bag. White for Leaflet giving information on Lawns.

LAWNS

It is possible for the lawns in Florida to become famous as the most beautiful in the world. In few places can a new home become so quickly surrounded with luxuriant vines, trees, shrubbery and flowers. More can be accomplished in this climate in one season than can be done in five seasons in the North. But it, of course, requires work and skill to keep up the beauty of a lawn. It is necessary to feed the grass well, as you can't expect it to remain beautiful after the elements of plant food have been exhausted.

ITALIAN RYE GRASS

Sow 200 pounds per acre for lawns, or at rate of 1 pound for a space 10x20. One of the most valuable grasses for fall planting, a quick grower, an annual, dying out the first summer. It is used most in Florida as a lawn grass, and makes one of the quickest growths that can be planted. It is generally sown over Bermuda or other lawn grass and will make a green lawn till spring. We are selling a great quantity of this each season and the sale is steadily increasing. I b. 15c; 5 lbs. 40; 10 lbs. 75; 100 lbs. write for prices

BERMUDA GRASS

Sow for lawns 100 pounds per acre, or 1 pound for a space 20x20. This is the most valuable lawn grass for Florida, as it is well adapted to light soils and in some sections is the only grass that will make a good sod on this class of soil. It also does well on clay and loamy soils. It is rather late to start in the spring, but stands hot, dry weather remarkably well, making a valuable summer lawn. Some gardeners prefer to mix a percentage of Kentucky Blue Grass and white clover with Bermuda and especially when a quick lawn is desired, as the white clover and the Kentucky Blue Grass will make a good green showing before the Berumda grass is ready, but the Bermuda grass is to be depended on for a permanent summer lawn. Lb. 35c; 10 lbs. \$3.00.

For winter lawns, Italian Rye is used. We sell carloads of Italian Rye ach season for Florida winter lawns. See description on this page. cach

CLOVER SEED

White—Well known. It forms a thick, close turf, is excellent to sow for pasturage, especially on sandy soils, and should enter into the composition of all lawn mixtures. Alone, it requires 15 to 20 pounds per acre; in mixtures from 2 to 3 pounds. Lb. 60c, postpaid; 5 lbs. \$2.25.

KENTUCKY BLUE GRASS

Sow for lawns 70 pounds per acre or 1 pound for a space 20x20. It is rather sensitive to heat, but not so to cold weather, and on this account does its best in the fall, winter and spring. It grows slowly at first, forms a very compact turf, making a fine pasturage when once estab-lished. It is much the best, however, to combine other grasses with it for either lawn or pasturage. Sow in the spring or fall. Lb. 25c, postpaid; 5 lbs. \$1.00.

We Carry a Complete Line of Insecticides and Germicides and All Spray Materials—Write for Price List. We Can Supply Baby Chicks. All Breeds, Wholesale and Retail. Write for Prices.

ORDER NOW-It is better to have seeds on hand weeks ahead rather than be delayed one day when the proper time arrives to plant.

Potatoes are a profitable Fall crop. Our Planting Guide gives valuable information on potatoes for Fall Planting.

STRAWBERRY PLANTS

STRAWBERRY PLANTS We have growing stations in both North Carolina and Tennessee. Our Strawberry Plants are excellent quality. We advise placing orders as early as possible, as it will enable us to an-ticipate the demand and handle your orders to better advantage. August and September are the best months to set Strawberry Plants to produce best results for early berries in December; October and November planting for berries in early spring. We offer only two varieties, although the number of varieties are many. These two varieties are best: Klondyke ______50c per 100; \$2.00 per 500; \$3.00 per 1,000 Missionary ______50c per 100; \$2.00 per 500; \$3.00 per 1,000 Above prices by Express collect. If by Mail, add 15c per 100.
